POWER UPDATE

Total eclipse of the Sun

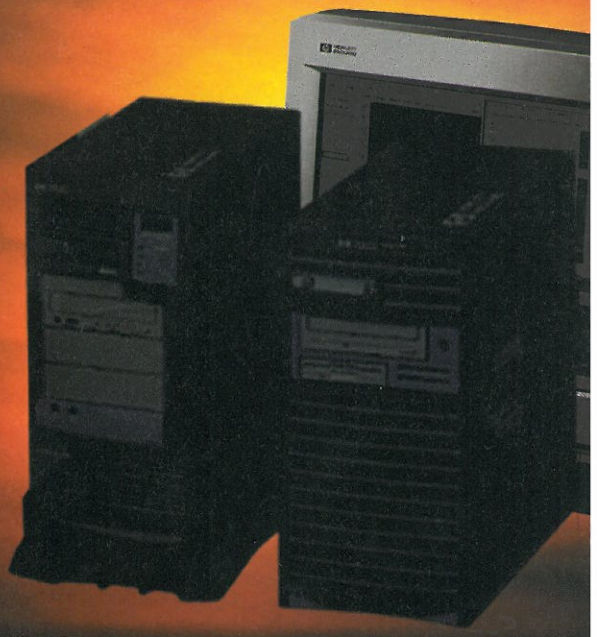

On August 11, you can see a total eclipse of the sun. Anywhere between Cornwall and Rumania. Stuttgart, Germany is ideal for viewing. But you don't have to wait that long for a total eclipse of another kind. Read on ...

Total Eclipse

HP eclipses the competition with future-oriented HP VISUALIZE workstations – delivering the world's top graphics performance. Hewlett-Packard has just expanded its VISUALIZE workstation family with a new line of high-performance Windows NT™ workstations and a powerful new generation of UNIX® workstations based on the PA-8500 RISC processor.

HP VISUALIZE workstations are ideal for engineers whose design work requires superior graphics and application performance.

HP VISUALIZE WORKSTATIONS

Power up with HP

Protect your investment!

How? HP has a competitive offer you simply can't refuse. This is your chance to replace your old Sun workstation with a higher-performing HP system – and get a cash rebate. From now until October 31, HP offers **DOUBLE** rebates to all SUN users who upgrade to a HP VISUALIZE B1000 workstation or any HP VISUALIZE Personal workstation.

We have it all...

From low-cost NT entry-level systems right up to high-performance UNIX® multi-processor machines – HP VISUALIZE workstations fit everywhere. Optimal application performance, outstanding 3D graphics performance, and clearly documented growth paths guarantee the best possible protection for your investment.

...and we have it all mapped out

Looking ahead, today's HP VISUALIZE workstations put you on the best path to tomorrow's IA-64 architecture, the future of technical computing. Working closely with Intel, HP is on the forefront, delivering products based on this next-generation microprocessor architecture. With HP, you have the security of binary compatibility between your PA-8500 and IA-64 based applications. This level of compatibility is available from only one vendor, Hewlett-Packard.

But HP's highly successful PA-RISC processors will continue to offer price/performance benefits into the next millennium. With HP's parallel PA-RISC/IA-64 processor roadmap **YOU** decide when to change to IA-64 – ensuring a smooth and economical transition.
